AT GRAND BANKS, WE HONOR THE PAST WHILE EMBRACING PROGRESS AND EVOLUTION

At Grand Banks, we are always mindful that we are working with an iconic and much-loved brand. These motor yachts have a long and rich heritage and for over sixty years have defined a lifestyle of freedom, adventure and onboard luxury.

Every new model we launch pays homage to these values while introducing new technologies and refinements that add to the comfort and performance of these exquisite vessels.

It's a role we undertake with pride and consider a privilege.

Mark Richards, CEO and Designer

GOOD ENOUGH WAS NEVER GOOD ENOUGH!

Over sixty years ago, when Robert Newton founded the company that would soon become Grand Banks, he and his team embarked on a quest for perfection.

Year after year, decade after decade, they introduced models that transformed and redefined the world of recreational boating and motor cruising.

They set and raised our standards of engineering, design, performance and luxury that remain unrivalled to this day.

It's a pleasure to see so many of these lovingly preserved treasures still gracing harbors and bays in every corner of the globe.

DESIGN

THE PAST CATCHES UP WITH THE FUTURE

The GB60 was designed to celebrate 60 years of our company building these class-defining motor yachts.

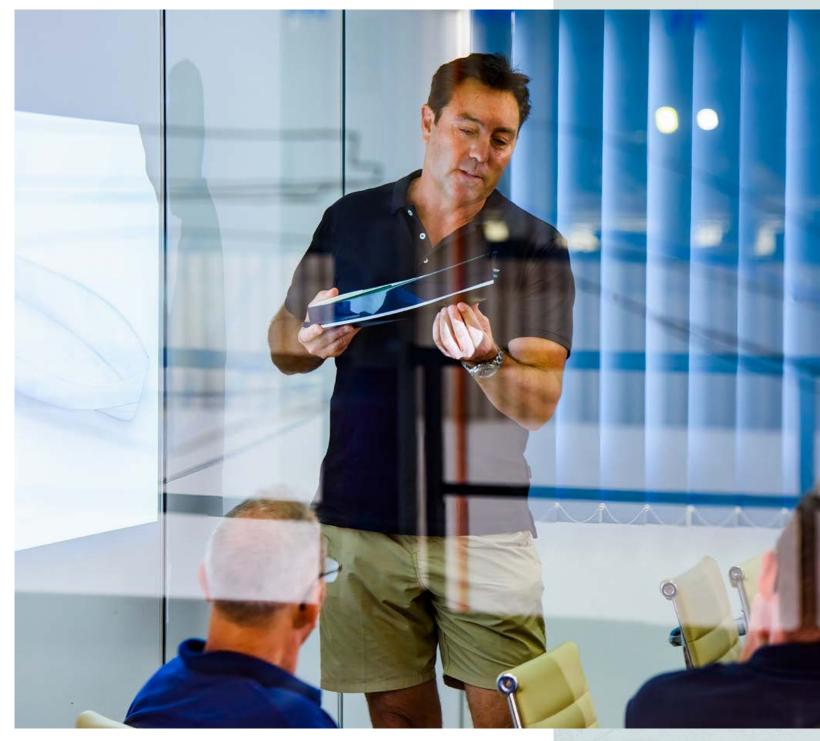

At our 50,000 square meters, fully covered production facility, we've achieved a perfect combination of stateof-the-art technology and traditional hand craftsmanship.

Our 24-man design team is dedicated to evolving our standards of luxury, elegance and utility while pushing the envelope of what is possible in terms of performance, stability and efficiency.

The result is a time-machine, an exquisite 60-foot motor yacht that projects the opulence of a bygone age into a future that's within your grasp.

MEMORIES ARE MADE OF THE MOMENTS YOU SHARE

GRAND BANKS

A SYNERGY OF HULL DESIGN, EXOTIC MATERIALS AND BUILD PHILOSOPHY

All models in the Grand Banks range are built with our proprietary V-Warp® Technology.

Designed by our team of leading naval architects, the underwater geometry of our hull form was informed by the NASA and American Navy databases and then further developed by our CEO's experience as an ocean racing champion.

The warped, semi-displacement form reduces drag while adding the buoyancy, stability and lift that allows the boat to reach plane speed with minimal energy and effort.

Our extensive use of carbon fiber dramatically reduces weight, while our construction techniques maintain extreme rigidity. It's this combination that enables V-Warp® technology to deliver class-leading speed and stability while using only half the fuel of a similar sized boat.

V-WARP TECHNOLOGY MAKES PERFECT SENSE OF THE ADAGE, "LESS IS MORE!"

LESS FUEL, **MORE RANGE** LESS POWER, **MORE SPEED** LESS WEIGHT, **MORE STABILITY**

PERFORMANCE, HANDLING AND EFFICIENCY

There's no one reason that ensures a Grand Banks achieve such extraordinary performance characteristics.

There are three!

It's the synergy of our hull form, our use of exotic materials and our build philosophy that delivers our speed, characteristically soft ride, ease of handling and extraordinary fuel efficiency. Our combination of Vinylester-infused e-glass in the hull and carbon fiber in the deck and superstructure increases strength and durability while reducing weight.

HULL FORM

Designed by ocean-racing champion Mark Richards and his team of naval architects, the hull design was informed by data from NASA and the US Navy. It delivers a low running attitude that reduces resistance and delivers a All bulkheads and fixed furniture are fused to the hull. This 'torsion box' rigidity won't flex or creak. Large mass components are positioned to ensure longitudinal and transversal equilibrium.

GRAND BANKS GB60

LIVE YOUR LIFE BY A COMPASS, NOT A CLOCK!

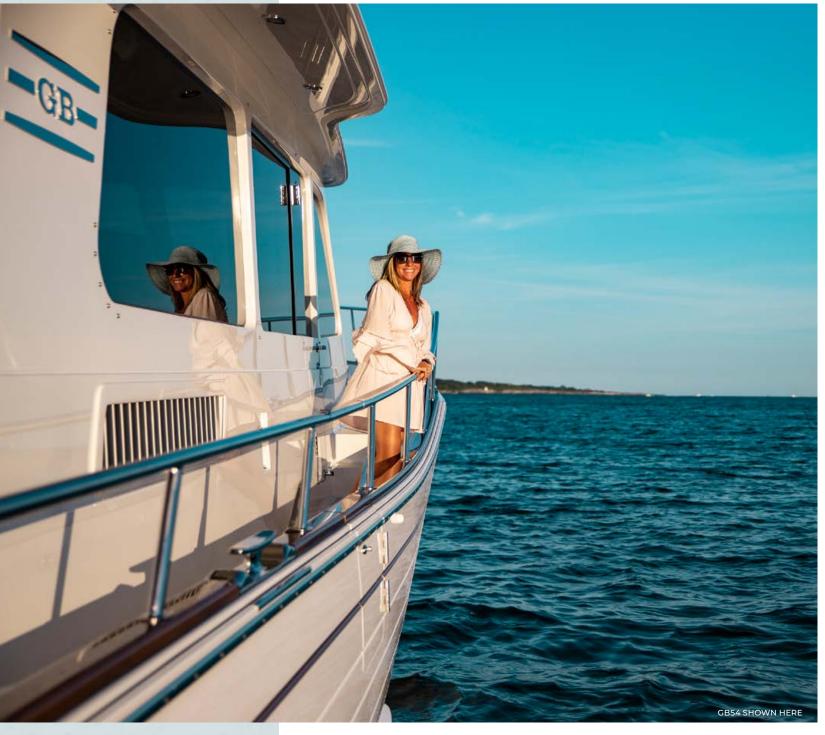

CUSTOMIZATION

EVERY GRAND BANKS COMES WITH A UNIQUE LIFESTYLE. YOURS!

Every model is made to order. Quite simply, this means that construction does not begin until the owner is 100% delighted with the design and specifications of the yacht we are going to build.

There is a vast range of options to consider – engine and drive train, sedan or open top, interior configurations, color palette both inside and out, fixtures and fittings, fabrics and upholstery.

Our team is on hand to guide you through every stage of the process.

CUSTOMIZATION

UPHOLSTERY AND DESIGN

We have a wide range of fabrics and upholstery to help you create the style and ambience that will suit your onboard lifestyle.

You can consult with our inhouse team or, if you prefer, use an interior designer with whom you are already familiar.

COMFORT AND STABILITY

While the V-Warp[®] Hull is inherently stable, we appreciate that some members of the family may be more sensitive to motion than others.

We offer a variety of stabilization options – the gyroscopic Seakeeper, Humphree Fin systems and Trim Tabs are all options.

CUSTOMIZATION

CHOICE OF HULL COLORS

When commissioning a motor yacht, your choice of hull color will play a fundamental role in its style and appearance. You can experiment with various combinations using the configurator on the 'Build a boat' page of our website. Of course, we also offer custom colors from a broader palette.

COVE LINES AND BOOT STRIPES

These subtle details can create a very stylish effect in combination with your choice of hull color.

GRAND BANKS GB60

EASE OF OPERATION

ADVANCED SIMPLICITY

The GB60 has been ergonomically designed to keep the workload of owner operators to an absolute minimum.

At the helm station, you'll find the control interface inspires that delightful feeling of having power at your fingertips. Whether you've chosen the pod or shaft drive option, the combination of uninterrupted sight lines and intuitive controls makes it easy to manoeuvre the boat in crowded marinas and into tight slips. (You'll find the same controls on the flybridge and an optional pop-up joystick in the cockpit.) And for mooring, you can simply step out of the door beside the helm station to where a cleat has been conveniently located.

THE BUILD JOURNEY

YOU'LL FEEL LIKE YOU'RE ON BOARD FROM DAY ONE!

Before construction begins, you'll be invited to come and spend some time with us at our factory.

You'll find this to be a fascinating opportunity to understand the process your boat will follow as it leaves the mold and then snakes through the production facility from one department to the next.

And you'll receive regular and constant reports of the boat's progress in a timely manner that allows for any suggestions and comments you'd like to make.

Signing the contract is just the start of the adventure.

CONFIGURATIONS

GB60 FLYBRIDGE

The GB60 Flybridge is the most fuel-efficient, long-distance cruiser in its class. A rare breed of opulence and performance.

GB60 SKYLOUNGE

The GB60 Skylounge exchanges wind-in-thehair excitement for the luxury of a spacious, climate-controlled room with a view.

LAYOUTS

The GB60 celebrates the 60 years in which Grand Banks has designed and manufactured the motor yachts that created the cruising category.

Available in both Flybridge and Skylounge versions, this model sets new standards of luxury, handling and fuelefficient performance. She's capable of a range of over 2,000 nautical miles at 10 knots.

Both models have three large staterooms and multiple full size heads that bear the hallmark of Grand Banks' unsurpassed craftsmanship and opulent style.

The skylounge version has removed the lower helm station, bringing the galley forward and effectively creating a living space with separate relaxing and dining areas.
